

Email Signature Installation Guide

Trinity Support Limited

For Godfred Frimpong, Elisha-Lucilda N'Daw Harry and Kaylon Smith

Read This First

- The signature must be installed separately in each place where you send email.
- If you send from webmail, set it in webmail. If you send from Outlook, set it in Outlook too.
- IONOS Webmail signatures are set inside IONOS Webmail. If you also send from Outlook, phone mail apps or tablet mail apps, set the signature there too.
- Use a laptop or desktop if possible. It is easier than doing this on a phone.

Do not redesign the signature. Do not change the logo, colours, wording or spacing unless management approves it.

Which Signature Should I Use?

Person	Use this online signature page
Godfred Frimpong	https://trinitysupport.finaccord.pro/email-signatures/godfred-frimpong-webmail.html
Elisha-Lucilda N'Daw Harry	https://trinitysupport.finaccord.pro/email-signatures/elisha-lucilda-ndaw-harry-webmail.h
Kaylon Smith	https://trinitysupport.finaccord.pro/email-signatures/kaylon-smith-webmail.html

Step 1

Choose the correct signature

- 1 Open the signature index page.
- 2 Click the person who owns this mailbox.
- 3 Check the name and phone number are correct.
- 4 Copy only the visible signature block.

A. IONOS Webmail on a Laptop or Desktop

- Open Chrome, Edge or Safari.
- Go to the correct signature page from the table above.
- Click once inside the signature area.
- Press Ctrl + A, then Ctrl + C. On a Mac, press Command + A, then Command + C.
- Go to <https://mail.ionos.com> and sign in with the email address and mailbox password.
- Click the Settings wheel at the top right.
- Click All settings.
- Click Mail.
- Scroll until you see Signatures.
- Click Signatures.
- Click inside the signature box and press Ctrl + V or Command + V.
- Click Save.
- Click Set default signatures.
- Choose this signature for new emails.
- Choose this signature for replies and forwards.
- Click Save again.
- Start a new email and check that the signature appears.

Webmail

IONOS Webmail

- 1 Go to mail.ionos.com and sign in.
- 2 Tap Settings, then All settings.
- 3 Open Mail, then Signatures.
- 4 Paste, save, then set as default.

B. IONOS Webmail on a Mobile Phone

- Open your phone browser, not the email app.
- Go to <https://mail.ionos.com> and sign in.
- If the screen is too small, turn the phone sideways.
- Tap the menu or settings icon.
- Tap All settings.
- Tap Mail.
- Tap Signatures.
- Open the correct signature page in another browser tab.
- Press and hold on the visible signature, then choose Select all if available.
- Tap Copy.
- Return to IONOS Webmail, tap inside the signature box, then tap Paste.
- Tap Save.
- Open Set default signatures and choose the signature for new emails and replies.
- Send a test email to yourself.

If copying the designed signature is difficult on a phone, do the setup on a laptop instead. This is normal.

C. Webmail on a Tablet

- Open Safari, Chrome or Edge on the tablet.
- Go to the correct signature page.
- Copy the visible signature block.
- Open <https://mail.ionos.com> in another tab.
- Go to Settings, All settings, Mail, Signatures.
- Paste the signature into the box.
- Save it, then open Set default signatures.
- Choose the signature for new emails and replies.
- Save and send a test email.

Tablet setup is the same as laptop setup, but the settings menu may be hidden behind a menu icon.

D. New Outlook / Outlook on the Web

- Open Outlook.
- Click Settings.
- Click Accounts.
- Click Signatures.
- If more than one email account is shown, select the Trinity Support email account.
- Click Add signature.
- Name it Trinity Support Signature.
- Open the correct signature page and copy the visible signature block.
- Paste the signature into the Outlook signature editor.
- Tick the boxes for New messages and Replies/forwards.
- Click Save.
- Start a new email and check that the signature appears.

New Outlook

New Outlook / Outlook on the web

- 1 Open Settings.
- 2 Choose Accounts, then Signatures.
- 3 Add signature and paste the block.
- 4 Tick new messages and replies, then Save.

E. Classic Outlook for Windows

- Open Outlook on the computer.
- Click New Email.
- On the Message tab, click Signature.
- Click Signatures.
- Click New.
- Type Trinity Support Signature and click OK.
- Open the correct signature page in a browser and copy the visible signature block.
- Click inside the Edit signature box in Outlook and paste.
- Under E-mail account, choose the correct Trinity Support account.
- For New messages, choose Trinity Support Signature.
- For Replies/forwards, choose Trinity Support Signature.
- Click OK.
- Close the blank email and open a new email to test.

Classic Outlook

Classic Outlook

- 1 Open a new email.
- 2 Click Signature, then Signatures.
- 3 Click New and name the signature.
- 4 Paste, choose defaults, then OK.

Final Test

- Send a test email to your own email address.
- Check that the logo appears.
- Check that the correct name, job title, telephone number and email address appear.
- Check that the website link works.
- Repeat this test on phone, tablet and laptop if you use all three.

Final check

Test before using

- 1 Create a new email.
- 2 Check the logo, name and phone number.
- 3 Send a test email to yourself.
- 4 Repeat on every device you use.

Troubleshooting

- Logo missing: delete the signature and paste it again from the online signature page.
- Signature appears too large: use the Outlook or webmail signature editor to reduce the image size slightly, but do not change the wording.
- Signature does not appear automatically: return to signature settings and tick the default boxes for new messages and replies.
- Wrong person appears: delete the signature and use the correct person's online signature page.
- Phone setup fails: complete the setup on a laptop. This is usually easier and more reliable.
